Multi-Touch Monitor?

As well as Tablet computers and Smart Phones, Multi-Touch screens are available for standard computers and laptops too. Ideal for students with visual difficulties, rather than struggling to use a Mouse cursor to move things around on the screen, they can simple point with their fingers and hands to what they want to do.

These touch screen monitors help make such technology affordable, and more importantly more accessible. When used with CCTV devices, such as Zoom-Ex, it can make usage much more user-friendly.

(Windows Only - Prices to be advised).

As seen at the SLC Expos!

New Plustek OpticBook

The popular Plustek OpticBook 3600 is now being replaced with a newer model, the 3800. It has the following features:

- Special book-edge design for scanning books, perfectly reproduce the original layout
- Fast scanning speed for enhancing scanning efficiency
- One-touch buttons design for scanning convenience
- Quickly convert Searchable PDF files, and easy to search from your save documents
- Accuracy OCR (Optical Character Recognition) and friendly usage software bundled

With an expected release date of August, further information is to be expected about these. No word yet on Mac Compatibility.
